WORK EXPERIENCE

Intern – IoT & Robotics Developer
STPI, Kalpatru CoE, Visakhapatnam

26/05/25 – 15/11/25

- Collaborated in a 3-member team to design and develop IoT-based robotic arms using Arduino, Raspberry Pi, and 3D printing.
- Built a 6 DOF Robotic Arm with a web-based control system using React.js, Three.js, Express.js, and MongoDB, hosted on Raspberry Pi.
- Developed a 4-Axis Robotic Arm with a Python Tkinter GUI, enabling real-time communication and control via Arduino.
- Improved control precision and real-time monitoring using web-based and GUI interfaces
- Designed and fabricated robotic components using CAD modeling (Tinkercad) and slicing tools like Ultimaker Cura for 3D printing.
- Gained hands-on experience in Industrial IoT (IIoT), embedded systems, robotics, and full-stack integration, while working in a collaborative environment.

PROJECTS

AttendMark – smart attendance system | [LINK](#)

- Developed a full-stack Smart Attendance System using MERN stack to automate attendance tracking using student PINs, reducing manual effort.
- Implemented role-based authentication (Admin & Faculty) with modules for student/staff management and secure data handling.
- Built attendance reports and dashboards with subject-wise/monthly analysis, including Excel export and data visualization using charts.
- Designed a responsive UI using Tailwind CSS and deployed the application on Vercel (frontend) and Render (backend).
